

Pershing 108 - 2011

Boat ID: 3880

Date: September 27, 2019

This Pershing 108' (33m) is a luxury sport vessel, constructed by the Italian builder Pershing S.p.a. and launched in 2011. For this superyacht's naval architect is Pershing's in-house team, while her beautiful exterior is by world-renowned Fulvio de Simoni from Ital Projects. She features a versatile layout, aggressive profile, super-structure windows, the latest on-board innovative technology as well as unparalleled performance.

Three generous guest cabins, a TV room (possible to convert to 4th owner party cabin), and three crew cabins can be found on board Pershing 108.

The completely personalized under deck layout offers a spacious VIP cabin at the bow, a guest cabin, a TV or family room and a full beam master cabin amidships. The key element of the yacht's elegant interior is the natural light in the architecture of the hall, coming through the wide opening of the lateral windows. The disappearing aft bulkhead opens the salon and aft deck to one another creating a freeflowing entryway area.

Upon entering the main salon, towards the aft there is a dining table with a black python leather top and a large sofa, both custom made by Fendi Club House, facing a cabinet containing a 52" TV, an elegant coffee table and two honey-colored leather ottomans. This great area opens to the aft deck entertainment area via a disappearing aft glass bulkhead.

The bridge consists of three comfortable, adjustable central pilot seats produced in collaboration with Poltrona Frau and Besenconi. The steering console is designed with the latest navigation and communication technology, including a complete Furuno system displayed on 18" masters screens.

The area below deck of the Pershing 108 can be accessed via a wide and comfortable staircase leading down from the pilot seats to a refined and elegant environment embellished with the Poltrona Frau leather that enriches the bed frames, furniture tops and wall TVs, giving the environment a very cozy and sophisticated style. The master cabin is completely personalized and the Fendi Casa leather has been used here as well.

Beginning in the bow, the spacious and perfectly square VIP cabin offers wide and livable living space, equipped with an ample head giving guests a high degree of comfort.

The guest cabin to port, with twin beds and en suite bathroom, is a great step forward in terms of on board versatility. In fact, the beds were designed to flank so as to form a king size bed or to be used as two single beds. Instead of the starboard cabin on the right, as in the standard layout of the P108', there is a more user-friendly TV room, also known as the family room, with a large practical convertible sofa bed, customized with the fabric of the new Armani Casa collection and placed facing the large TV screen.

The key feature of the master cabin is the suggestiveness of the natural light coming from the large lateral windows. The play of light and the colors are emphasized by the black Fendi leather that embellishes furniture tops, the headboard and the canopy. To complete this area there is another sofa bed with Armani Casa textiles, designed by Milano Bedding. Moreover, in the suite there is a large wardrobe, a very modern fully-equipped business area and a fridge-bar.

At the stern, accessible from inside as well as from the outside of the yacht, is an area that has been equipped to accommodate the crew. It is made up of three cabins with bathrooms, a laundry room and a dinette combined with the kitchen.

The incredibly spacious sun deck has a retractable steering console, a large C-shaped sofa with a table that can be lowered to seating level and four folding chaise lounges that turn into comfortable ergonomic seats, making this an independent and functional area that can be best enjoyed in moments of relaxation on board. The large cockpit can be used both during the day and in the evening; a spacious covered area, equipped with a sofa and a table that can host up to 10 people, with an elegant crystal top with a steel base, as well as 5 modern chairs.

A large aft hangar with a folding bridge allows for the stowing of a 5m yacht tender. There is also a second hangar that can contain water toys as well as their davit launch.

Built in composite, the Pershing luxury yacht 108 is run by three MTU 16V 2000 M94 diesels, reaching an impressive top speed of 40 knots and comfortably cruising at 30 knots. Le Caprice IV boasts a beam of 22ft and a 6-foot draft.
